CASH FOR APPLIANCES PROGRAM

The California Energy Commission administered a program called The Cash for Appliance Program, which was funded through the Federal American Recovery and Reinvestment Act. The stimulus, which was passed last year, set aside \$300 million for states to distribute rebates on environmentally friendly home appliance.

California was allocated \$35.5 million, and on July 29, 2010, the Cash for Appliances Program was extended to offer HVAC system replacements a rebate between \$500 and \$1000 for recycling your old system. Rebates are on a first come, first served basis and lasting until funds are expended. The rebate pro-

gram will save energy and money by replacing inefficient systems with more efficient equipment, offering Californians more choices to save money and energy on new system purchase.

The way the program works is when you purchase a qualified high-energy efficient heating and cooling unit, properly recycle the old system, and submit a complete application package within 120 days of the system purchase.

MORE WAYS TO CASH IN ON A NEW SYSTEM

In August 2010 the Lennox Manufacture rebate is going away for good. If you haven't had a chance to check out how great these rebates are, now would be the time to do it. Lennox is offering up to \$1,200 on qualifying home comfort systems.

How great is that, you can get money for purchasing a new qualifying system, get the system you want, and save money on your utility bill in the long run.

There are also more ways to get money back for installing a new system. With all the rebates and tax

credits out there why not take the time to speak with a Comfort Consultant and find out how to take advantage of all these great deals and get a system that best fits your wants and needs.

Free in Home Estimate

There has never been a better time than NOW to schedule a Free in Home Estimate with a Cool Air Solution Comfort Consultant. Not only will they be able to explain how you can get up to \$4,950 back in rebates and tax credits on qualifying installs, but also help you find out which system best fits your needs.

ANNUAL MAINTENANCE

If replacing your system isn't something you are thinking about doing right now, then maintenance on your current system is something to think about.

There is nothing better for your heating and/or air conditioning system than annual maintenance. Annual maintenance allows your system to work at peak efficiency year in and year out. A system that is maintained experiences considerably fewer breakdowns. This helps eliminate the need for you to pay for costly repairs. You'll enjoy the peace of mind in knowing that your

system is saving you money on your utility bills every time it comes on.

Our technicians are company trained and keep up on all of the advances in technology, so that your needs are met quickly and efficiently. Preventative maintenances are a great way to keep your system running clean, efficient and most major repairs can be avoided.

We also offer an Energy Savings agreement (ESA) for 1, 2, or 3 years, for one system or multiple systems. When you sign up for an ESA you receive 2 maintenances a

year to make sure that your system is running in perfect condition for the upcoming season. With most ESA's we come out in the Spring and in the Fall to make sure your system is running properly.

With our ESA you will receive 15% off any major repair, and priority scheduling. We will give you a courtesy call the month the maintenance is due to remind you that maintenance is needed.

Sign up for our Energy Savings Agreement (ESA) and let us keep your system in tiptop shape for you...
